Monday - Add on

Name	Description	Duration (minutes)
AI workshop, setting up and using VAIA.	Whether you're an administrator configuring VAIA for your environment or a day-to-day user wondering what AI can do for your work, this class has something for you. We'll cover how to get VAIA set up and connected, key security considerations, and how to work with AI agents — including agent types, effective prompting, and using reference files to get better results. We'll also explore real-world use cases showing how VAIA can save time, surface insights, and support smarter decision-making in Clarity. No deep technical background required — just a curiosity about how AI can make your work easier. Also, if you have experience already, please come prepared to share some Prompts and/or Agents.	3 hrs
Hands-on End-to-End training with Clarity's New Built-in Reporting	Tired of waiting on enterprise reporting requests? This workshop introduces you to the new self-service capabilities of Clarity's Reporting Workspace. We will walk through realistic use cases—from building drag-and-drop Canvas layouts to scheduling automated PDF and PPTX exports—designed to replace your legacy Jaspersoft workflows. This exercise is built to boost your confidence in Clarity's no-code design tools, helping you transition seamlessly to a model where creating a report is as intuitive as managing a project. Discover how these native features can simplify your daily operations and provide the "single source of truth" your stakeholders demand. (BYO Laptop - No prior experience needed!)	3 hrs
Resource Management A to Z	This session moves beyond the basics to explore the full lifecycle of resource management within Clarity PPM, from foundational definitions to advanced strategic decision-making. It maps out a comprehensive "Crawl-Walk-Run" maturity path, detailing how to standardize capacity, manage demand, and leverage "What-If" scenarios for optimized staffing across the organization. Participants will walk away with a clear framework for persona-based responsibilities and structured staffing procedures designed to maximize portfolio value.	3 hrs
How to maximize your Rego U experience	This quick discussion will highlight tips for ensuring you will get the most out of your Rego University experience. We will discuss how to select classes, meet with peers, and obtain one on one advice over the 3 days of the conference.	30 min

Broadcom Classes

Name	Description	Duration (minutes)
Balancing Strategic Goals, Budget, and Capacity with the itd Portfolio Optimizer	Discover how the itd Portfolio Optimizer helps organizations make strategic portfolio decisions directly within Clarity, balancing goals, budgets, and resource constraints in one interactive view. In this session, we will show how automation can propose an optimized planning scenario, reveal true bottlenecks such as role capacity, and help decision-makers to make well-informed portfolio decisions.	50-60 min
Better Decisions by Design: Turning Clarity into a Strategic Portfolio Command Center	Clarity is often seen as a project management tool—but its real power lies in enabling better portfolio decisions. In this session, we demonstrate how a user-centric configuration, the right data, and a connected portfolio workspace can help organizations link strategy to execution and make informed decisions where they matter most. Learn how to combine Clarity's standard capabilities into an integrated portfolio cockpit that drives transparency, alignment, and action.	50-60 min
Can You Reallocate \$10M in 10 Minutes? Scenario Planning for the Next Market Disruption	Markets don't wait for your next quarterly planning cycle. When disruption hits, leaders need to evaluate tradeoffs, shift investments, and reallocate resources immediately. Learn how organizations are using Clarity scenario planning to model uncertainty, pressure-test strategic decisions, and respond faster when the next major disruption arrives.	50-60 min
Clarity AI: Because "Just Bumping This" Isn't a Strategy (and Timesheets Won't Fill Themselves)	Let's be honest—nobody woke up this morning excited to send three "just bumping this to the top of your inbox" emails. If your current portfolio strategy relies on color-coded Excel sheets and begging people for status updates, it's time for an intervention. This session is a zero-buzzword, 100% practical look at how we are realistically integrating AI into Clarity to tackle your actual daily headaches. We will walk through our current vision, showcase real-world use cases that do the administrative heavy lifting for you, and map out a future roadmap so smart it might just approve your PTO (and finally handle that one guy who always forgets to update his task status).	50-60 min
The PMO's Revenge: Leading the AI Revolution	Last year, we asked if AI would kill the PMO. This year, we're showing you how the PMO strikes back. Stop being the victim of automation and start being the architect of the AI-driven enterprise.	50-60 min
Stop Hunting for Data: Building a 'Self-Service' Executive Culture in Clarity	Tired of manual PowerPoint exports? Learn how to configure Clarity so executives can find their own answers, and why "transparency" is the ultimate organizational lubricant.	50-60 min

Infrastructure Portfolio Management: Managing the Hybrid Cloud Estate as a Strategic Product	Bringing SPM discipline to Cloud Infrastructure. Learn how to manage your infrastructure not as a cost center, but as a strategic asset in you product portfolio. Learn how to expand your Clarity usage beyond traditional ways of working for larger enterprise ROI gains.	50-60 min
Tokenomics: Aligning Digital Labor, Token Costs, and ROI with ValueOps	Right now, your organization is pouring millions into LLMs, copilot agents, and cloud infrastructure, only to receive a massive, unmappable 'utility bill' at the end of the month. Because traditional FinOps tools only show what you spent rather than why, finance leaders are forced to write off transformative AI development as volatile Operating Expenditure (OpEx). This session goes far beyond basic token-counting. We will reveal Tokenomics with ValueOps a granular financial ledger that maps technical token consumption directly to enterprise R&D output and business value realization. Stop treating AI like a volatile overhead expense and start governing it like the multi-million-dollar capital investment it actually is.	50-60 min
Vaia in the Wild: How AI is Actually Transforming Portfolio Decisions Today	Move past the hype. Real-world use cases of Vaia summarizing project risks, generating status reports, and identifying portfolio redundancies in real-time.	50-60 min
Close The Value Realization Gap: Why We Fund Projects but Never Track the Benefits	70% of projects fail to deliver their promised ROI. We'll show you how to use Clarity's Benefit Plans to close the loop and hold business owners accountable for the "Value" in ValueOps	50-60 min
Frictionless Cost Accounting: Ending the 'Tax' on Your Product Teams	Cost accounting is usually the 'tax' we pay to get work done—manual time entries, disputed allocations, and the monthly scramble to close the books. But what if your financial data was a byproduct of work, not an interruption to it? We're moving toward a frictionless future where Clarity, and Rally, automate the capitalization of labor. Join us to see how to give Finance the precision they demand while giving your teams their time back.	50-60 min
The AI Nervous System: Using ConnectALL to Power Autonomous Software Delivery	AI coding assistants can generate code in seconds, but without context, they are just fast engines driving in the wrong direction. The real bottleneck isn't writing code anymore; it's the visualization and automation of the entire delivery pipeline. In this session, we leave behind basic 'data syncing' and introduce ConnectALL as the AI Nervous System. Learn how to feed real-time, context-rich data into your autonomous AI tools, creating a self-governing software factory that delivers value without the manual handoffs.	50-60 min
Velocity Over Volume: The Portfolio Leader's Playbook for the AI Era	The demands on portfolio leaders have never been higher, and the administrative weight of the role has never been heavier. Status roll-ups, spreadsheet reconciliation, and manual governance checks consume the very hours that should go to strategy, prioritization, and outcomes. AI is changing that equation. In this session, we'll look at how portfolio leaders at large enterprises are using AI to absorb the administrative load. It surfaces risks and dependencies automatically, keeps plans and reporting current without the chase, and streamlines governance, so the PMO can spend its time where it actually creates value. We'll cover how the portfolio leader's role is evolving, the skills that will define the next generation of PMO, and how Clarity and Rally work together as a strategy-to-execution spine, with Vaia AI connecting portfolio intent to on-the-ground delivery.	
ValueOps Roadmap Session		40 min

Functional

Name	Description	Duration (minutes)
Action Item Responder	Imagine responding to Clarity PPM workflow tasks (like timesheet approvals, budget reviews, and stage gate decisions) directly from your email. No login required, yet all conversations, decisions, and even context from attachments and images are automatically - and securely - captured in Clarity. Sound like a dream? Join this class to learn how to save time and increase adoption with this easy innovation.	50-60 min
Advancing the SPM Journey: Cambia Health presents End to End Lifecycle Transformation	SPM in Action - a second client case study. A current Rego client will share their SPM journey, including why it was necessary, the technical challenges they faced and how they were addressed, the impact of organizational change, how Rego's expertise and technical assets supported the implementation, and the benefits they're now seeing with their new operating model.	50-60 min
Advancing the SPM Journey: Eaton Engineering presents Product Roadmaps and Strategic Alignment	SPM in Action - a client case study. A current Rego client will share their SPM journey, including why it was necessary, the technical challenges they faced and how they were addressed, the impact of organizational change, how Rego's expertise and technical assets supported the implementation, and the benefits they're now seeing with their new operating model.	50-60 min
AI in Clarity & AI Adoption Roundtable Panel	Join this sharing sessions on Clarity AI capabilities & Gaining AI adoption. There are some great best practices and lessons learned that drive successful and easy adoption!	50-60 min
AI Progression: Capabilities, Limits, and What's Next	This presentation gives leaders a clear view of what is improving quickly in AI and what remains difficult so expectations and investment decisions stay grounded. It walks through the capability areas that are most relevant to enterprise value, including better interaction with tools and systems, stronger multimodal understanding, and more practical automation of knowledge work. It highlights the reliability challenge and explains why evaluation, testing, and governance are now as important as model selection. It then connects AI progress to economics, showing how falling costs and improved efficiency are expanding the number of viable use cases and changing vendor and platform choices. Finally it offers a pragmatic outlook for the next one to two years, including the rise of more autonomous workflows, increased regulation and standards, and the need for a portfolio approach that balances innovation with risk control.	50-60 min
Aligning Clarity with Your Ecosystem for Better Outcomes	Has your organization made significant investments in technology solutions without seeing precise results? Do you have the right capabilities yet lack a vibrant and interconnected end-to-end solution? Come to this session to learn more about the importance of a living strategic roadmap and how Rego's SPM/PPM Assessment program can help. This session will review the key elements needed to create an effective roadmap that can help optimize your digital ecosystem, drive increased maturity, and increase engagement within your organization.	50-60 min

Bridging TBM and SPM with Clarity	Does your organization own Apptio, or are you looking into purchasing it? In this session, we will dive into what Apptio is and how it can complement your current Clarity solution. Also gain an understanding of the TBM methodology and where SPM and TBM intersect.	50-60 min
Clarity Dashboards and Reports: Examples and Strategies You Can Use	Are you looking for some great examples of dashboards in Clarity? We know you can't get enough of them and neither can we! Come to this session to see a host of new reports that Rego has created! This session will review a myriad of pre-built dashboards in use today that can spark ideas for you to implement in your organization. Learn about Rego's approach to prioritize and create reports, and how we gathered requirements from our Rego experts to target the content you need!	50-60 min
Clarity Mobile App	Learn to access the power of Clarity on-the-go with the free Rego Clarity Mobile App. With simplified timesheet entry, true SSO, and intuitive access to projects, checklists, ideas, and approvals, you can manage work, updates, and approvals anytime, anywhere.	50-60 min
Clarity Visualization Strategy: Reporting by Persona	Are you struggling to come up with a visualization strategy with all of the options available - widgets, portlets, Jaspersoft, Ad Hoc, etc.? This class will explore the various visualization tools available in Clarity and help you understand the best way to output your data. We will provide use cases and examples to assist you in developing a strategy for your organization.	50-60 min
Concepts in Creativity	The concepts of creativity are tools and habits that help you and your team become more creative. During this session, you will learn simple tricks and methods to encourage a more creative work environment. Join this session to learn how to structure effective team meetings, workshops and all-inclusive ideation sessions. Even learn about some great work habits to boost your career!	50-60 min
Failure Forum: What have we Learned from Challenging Implementations	A candid, anonymous-friendly roundtable where practitioners share implementation horror stories. Facilitated carefully to keep it constructive, this tends to be one of the most popular and candid sessions at any conference.	50-60 min
Financial Mastery: Optimizing Budgets & Realizing Value	Do you want to understand Clarity's configuration and functionality for financial management? In this class, you will learn about the OOTB objects, views, and functions of financial plans, rates, and other related areas.	50-60 min
Gamification	Want to boost Clarity adoption and data quality, all while having fun and keeping users engaged? Learn how gamification can benefit your organization in this exclusive demo. Check out features that reward users for desired behaviors, enable personalization, and offer fun ways to track project health through the animated world of Planimals.	15 min
Innovations Overview		15 min
Intake and Prioritization Roundtable Panel	Do you want to talk to other Clarity customers that are using - or plan to use - demand management capabilities? In this moderated Roundtable, attendees can share experiences and provide insights on process, configurations, challenges, and successes. We will have an expert panel and then divide into small groups to discuss customer selected topics. 100% sharing. 100% learning.	50-60 min

Mastering the PPM & Agile Toolset - Clarity and Agile Integrations	The need for a dual operating model drives the need for a deliberate tooling architecture that will usually include a PPM / SPM and an Agile tool. Are you struggling with implementing Agile tools in your organization in addition to Clarity? This class will review best practices for implementing Agile tools in conjunction with Clarity - living in a Bi-Modal world. We will discuss how Clarity can be used to govern both types of work for teams, and how Agile tools should interface into Clarity.	50-60 min
Microsoft SharePoint, Teams, PowerPoint, EDM	See how multiple Rego innovations can save time, reduce effort, and increase adoption across your organization. Leverage Power Automate to connect Clarity with SharePoint, Teams, and Outlook—automating tasks like creating Teams for projects, managing permissions, and sharing reports with non-Clarity users. Discover how the RegoLink PowerPoint add-in keeps decks up to date with templates and live Clarity data, and how the Excel Data Manager (EDM) simplifies bulk updates by letting you edit and validate data in Excel before syncing back.	15 min
Clarity by Design: Choosing the Right Modules and Configuration for Your Organization	Every Clarity implementation involves two big decisions: which Modern UX modules best fit your processes, and how far to customize beyond the out-of-the-box (OOTB) setup. This session tackles both. We'll explore when to use specific Modern UX modules (roadmaps vs. hierarchies, CITs vs. Projects, etc.) to match the needs of your end users and business processes, then shift into an honest discussion of customization trade-offs — when sticking to OOTB attributes, views, and capabilities makes sense, and when it's worth moving beyond the standard setup.	50-60 min
Moventus	Do you have teams or groups that have a need for simple collaborative work management but are not using Clarity. And are those tools falling short when it comes to important issues such as visibility and governance. In this session you'll learn about Moventus a new add-on collaborative work management solution that can be embedded into Clarity.	15 min
Nudge	Join this class to hear best practice use of Rego Xchange, Rego SaaS Support Knowledge Articles, Broadcom TechDocs and Internet Searches. Using available resources to troubleshoot Clarity issues or gain knowledge on Clarity functionality.	15 min
Objectives and Key Results (OKRs) in Clarity	Aligning work to organizational strategy is a fundamental requirement in today's ever-changing marketplace. High performing organizations are moving beyond basic connections to introduce strategic hierarchies that are tied to real measurements of business value via Clarity's Objectives and Key Results (OKRs). Join our expert guides as they present key concepts, best practices, and the evolution of strategic alignment.	50-60 min
OCM Workshop: Beyond the Project Plan: A Change Management Road Trip	Bring a current initiative to this hands-on, two-hour workshop and learn how to integrate practical change management into your project plan. Through guided exercises, Rego experts will help you identify the activities, deliverables, and milestones needed to build executive sponsorship, engage stakeholders, address resistance, and drive lasting adoption. You'll leave with a practical framework, actionable tools and templates, and a clear roadmap you can apply immediately to a system implementation, process improvement, or organizational transformation.	50-60 min
Clarity Forms: Opening Clarity to Everyone	Learn how to replace email, spreadsheets and disconnected form tools with a streamlined intake process integrated directly with Clarity. This session will show how configurable forms can capture consistent, validated information and automatically create the appropriate Clarity records.	15 min
Rego Xchange & FREE MUX Migration Tool	Explore three powerful Rego innovations, all designed to streamline work and unlock Clarity's full potential. 1) RegoXchange's improved design and 100+ new assets every year boost adoption and productivity without reinventing the wheel. Instantly access dashboards, workflows, reports, and training modules. 2) The free MUX Migration Tool saves time and reduces risk by automating blueprint and view transfers across environments, ensuring consistency with just a few clicks. 3)	15 min

Resource Management Roundtable Panel	Do you want to talk to other Clarity customers that are using Resource Management capabilities? In this moderated Round Table, attendees can share experiences and provide insights on process, configurations, challenges, and successes.	
Resource Management Success: RMO and Leadership in Action	Does your organization struggle with resource management? Have you considered creating a Resource Management Office (RMO)? Do you struggle with a lack of executive sponsorship to drive adoption? This session will review how some organizations are succeeding in driving adoption and effectively managing resources by engaging leadership, RMOs, and utilizing more dedicated resources. Learn best practices for driving effective resource management across your organization.	50-60 min
Smart Integrations for a Single Source of Truth	You can't wait, integrate! Clarity is highly capable of being the center of a hub and spoke ecosystem for your project delivery. With flexible integration options, robust portfolio reporting, and decision support functionality, Clarity will help you consolidate data from multiple systems of record into one source of truth. Join this class to see common use cases for optimizing a PPM / SPM delivery value stream that cuts across a diverse suite of applications, including HR, Finance, ITSM, Agile, Work Management, and many more.	50-60 min
Solving Resource Allocation & Visibility, RM Best Practices	This session will align you with best practices for using Clarity's resource management functionality. Come and learn about the OOTB capabilities for resource insights like allocations, assignments, availability, and more. Additionally, tips and tricks will be shared, providing you with a toolkit of ideas for your organization!	50-60 min
SPM in Action: From Strategy to Work (Session 1 of 2)	Uncertainty in the economy and the marketplace requires diligent, focused efforts to align the work you plan to deliver with your organization's strategy and desired business outcomes. Using advanced SPM capabilities in Clarity, we will guide you through interactive exercises to build a hierarchical strategic plan, connect a portfolio of work items to that plan, and begin to visualize the intended flow of value in your portfolio. (Session 1 of 2)	50-60 min
SPM In Action: From Strategy to Work (Session 2 of 2)	Finite limits on people and funding for work items, competing priorities, and ever-present volatility make it challenging to ensure we are investing in the right work, while also demonstrating that we have the necessary resources to deliver results successfully. Building on Session 1, we will continue with interactive exercises to perform constraint-based prioritization and scenario planning, defining our optimal portfolio of work to achieve our business strategy. Then we will explore how we can effectively visualize KPIs and health metrics to measure our performance and identify opportunities for improvement. (Session 2 of 2)	50-60 min
The Connected Enterprise: Scaling Collaborative Work Management in Clarity	Are you looking to extend your investment in Clarity and share it with other stakeholders in your company? We know organizations today are looking for cool collaborative ways to work. Come check out what Clarity has to offer.	50-60 min
The Intelligent PMO: Predicting Outcomes with AI	This class explores the future of AI in project management, highlighting innovative use cases for predictive analytics. Participants will gain insights into emerging AI technologies and gather an understanding of Predictive Analytics and AI.	50-60 min

The Integration Advantage: Turning Your Conference Experience into Immediate Impact	The worst thing you can do after a week of intense learning is lose it all to the “real world” distraction of your inbox. Before you rush to the airport, join us for a final, grounding session designed to anchor your best ideas. Through guided visualization and structured documentation, we will transform your scattered notes into a focused strategy. Come share your one “Golden Nugget” from the week, get exclusive access to our post-conference resource hub, and leave with a battle-ready plan that makes this week truly count.	50-60 min
The Other Half of Clarity, OCM: Turning Implementation into Adoption	A successful Clarity implementation goes beyond technology — it also requires leadership alignment, trusted data, user engagement, and lasting behavior change. In this one-hour session, explore how organizational change management (OCM) can strengthen adoption and help organizations realize more value from Clarity. Through real-world examples and practical lessons learned, you’ll gain actionable ideas for building trust, increasing engagement, avoiding common pitfalls, and supporting long-term success.	50-60 min
The PMO Playbook: A Modern Day in the Life	Bringing back a classic topic with a modern update! Join this sessions to discuss tips and tricks for an optimized PMO experience in Clarity. This session is designed so attendees can share, collaborate, and benefit from their diverse experiences.	50-60 min
The Rego Power BI Reporting Suite	You spoke and we listened. Rego has invested a significant amount of time and capital to bring you (as part of RegoXchange) a free Power BI reporting suite that will unlock all of the great data in your Clarity environment. Join our Power BI architect on a walkthrough of this amazing reporting package. You will not be disappointed!	50-60 min
7 Trends Shaping the Future of PPM	To help you stay ahead of the curve, we’ve asked our 250+ expert guides to share the key trends they’ve seen firsthand while working with our clients. The result? We are equipped to prepare you for what’s coming next. In this class, Rego’s senior strategists will reveal the top trending PPM / SPM themes and share practical insights to help your organization thrive. Learn what’s shaping the future of PPM / SPM and discover actionable strategies you can utilize right away.	50-60 min
The Strategic Gatekeeper: Configuring Clarity for High-Impact Intake & Prioritization	Do you want to understand Clarity’s best practices for configuration and functionality in demand management? In this class, you will learn about the OOTB objects, views, and functions of Ideas, along with tips and tricks to support your demand management processes.	50-60 min
The Support Blueprint for a Healthy Clarity Environment	This class will discuss how successful Clarity users solve issues, discover solutions, and successfully utilize Clarity. As the tool grows in functionality, learn how you can support the tool and end users. Drive value for your Clarity investment by supporting end users and a technically healthy implementation at the same time.	50-60 min
Unifying Product and Project Management in Clarity	The need to report and organize work around the Products continues to grow. Join this session to hear how Project and Product Management can thrive together in Clarity.	50-60 min

Using MSP and Smartsheet with Clarity	Struggling to use an external scheduler like MS Project or Smartsheet with Clarity or investigating its potential? Learn how to effectively use these tools with Clarity in this training, which includes best practices and lessons learned. We will show both OOTB and Rego build connectors that will make the bidirectional connections seamless.	15 min
Visualizing the Future: Mastering Dynamic Roadmaps	Are you leveraging Clarity's Roadmaps yet? Come to this session to learn how OOTB Roadmaps work. You will learn how to configure views, targets, widgets, boards, and more! You will leave with great ideas you can bring back to your organization!	50-60 min
Voices from the Field: Real-World Success Stories	Hear from 3 - 4 existing Clarity customers as they share what's working well in their implementations. Gain insights from these real-world success stories.	50-60 min
Voices from the Field: Real-World Success Stories	Hear from 3 - 4 existing Clarity customers as they share what's working well in their implementations. Gain insights from these real-world success stories.	50-60 min
What's New & Next: Mastering the Latest Clarity Release	Do you want to understand the value of the new functionality in Clarity's most recent rollout? This class is for you! Attend an interactive demonstration and put these capabilities in action today.	50-60 min

Technical

Name	Description	Duration (minutes)
Unleashing Automations: No-Code Workflows and Business Rules in MUX	Looking to automate some tasks within your Clarity environment? This class will guide you through Clarity's workflow engine, covering instance vs. general processes, start options, action types, pre and post conditions, MUX workflows, and notifications.	2 hours
Clarity Under the Hood: Scripting and Dev Basics	This course will introduce fundamental programming concepts like variable assignment, conditional statements, and loops. The class will be taught in GEL and will build a solid foundation for future programming skills.	2 hours
Build-a-Blueprint Workshop	Join this interactive session where we build a Blueprint and leverage Blueprint rules to demonstrate the latest capabilities to improve end user experience. Attendees bring a real use case from their organization and, guided by a Rego expert, build out a working Clarity Blueprint from scratch during the session.	50-60 minutes
Building Custom Solutions and Apps with Studio	Just getting started with Clarity Studio? Join us to learn how to create new objects, CITs, attributes, and lookups in your Clarity environment.	2 hours
From Data to Insights: Mastering Native Reporting, Widgets, Views and Canvas	This class is a hands-on beginner training class on Clarity's native functionality for reporting. Learn how to build basic visuals/reports and leverage Canvas to get the most out of Clarity.	2 hours
Keeping Clarity Healthy: Housekeeping and Maintenance	Want to keep your Clarity environment running efficiently? In this class we'll discuss how to maintain your Clarity environment through the use of jobs, processes, and configuration. We'll also cover recommended maintenance activities to ensure your environment is running optimally.	50-60 minutes
Driving Decisions with Financial Driven Project Data	This course will focus on the financial setup and processing in Clarity. We'll discuss topics such as financial entities, fiscal periods, financial attributes, and how they all tie back to a labor rate matrix. These components are crucial for calculating labor costs within Clarity and enabling project managers to make financially sound decisions.	50-60 minutes
Modern UX Master Class: Advanced Admin and Blueprint Management	This course will take a deep dive into Modern UX administration. We'll cover the advanced MUX Administration settings, managing system wide views before deep diving into advanced blueprints topics such as visuals, modules, rules, and actions.	2 hours

Modern UX Basic Administration	This beginner-friendly course will cover basic administration within Modern UX. You'll learn about enabling MUX, establishing your System Settings, and Blueprints basics.	2 hours
New Clarity Reporting	This course will walk through the technical setup of data providers and using the new reports builder. A pre-conference course is also available where you will spend time setting up a data provider and also build a report from scratch.	2 hours
Power BI Ad Hoc Beginner	Utilize Power BI with the Clarity ODATA connector to get critical data for rich reports and dashboards. This class is a hands-on beginner training for Power BI. Learn how to build basic visuals and reports against the Clarity data warehouse.	1/2 Day
Resource Foundations: Matching Supply with Demand	This beginner-friendly course will begin exploring project management related themes and how they translate to Clarity. We'll discuss resources and calendars that demonstrate resource availability, and project teams which represent demand against your resources.	50-60 minutes
Mastering the Security Maze: Navigating OBS and Security Rights	Join us to discuss one of the most important - but also one of the most confusing Clarity topics - security. Learn how an OBS can be utilized to control security, how security permissions can be granted and revoked, and the pros and cons of the different types of security permissions.	2 Hours
